

Champion Seating Co.

Champion Seating Co. features high quality fabrics for your ergonomic chair needs; suitable for home office chairs, student chairs, business seating and 911 and/or 24/7 control room chairs. We have the best selection in the chair industry, offering the newest and innovative selections from the mills.

Helpful & Informative - Champion Seating's Upholstery Options...Unbeatable choices!

- "General Fabric Category Information" -

We have ... Many Collections to choose from and they all hit the mark!

We select our fabrics based on the highest quality and durability standards; always with careful attention to designer styles and colors to fit any home or office decor.

[Requesting a sample is easy \(by clicking on any fabric swatch\).](#) In just a few days you can have samples at your fingertips always at no-charge.

We have several "category" upholstery options to choose from, each offers unique characteristics that other suppliers can't offer. From high quality Everyday, Eco Friendly & NANO fabrics, to superior CRYPTON, Nauga Leather, and PVC free; each offering the highest features and standards that allows quality and value as well as long life durability.

[Again ...Individual swatch samples can be requested via email, and are no charge; easily done on any fabric swatch which gives you all the specification information as well.](#)

Our customers are active partners in our green initiatives. By browsing and searching for the samples that you need on-line, you help prevent more than twenty thousand pounds of sample materials from entering the solid waste stream annually. Champion Seating has made it easier and "greener" than ever to source the fabrics you are looking for - whatever industry you're in, wherever you are.

The newest collection is Agion[®] silver ion technology: The next generation of clean and beautiful. Some consider Agion an expensive choice; but **it is the healthiest upholstery in the industry. **Recommended for 24/7 & 911 chairs.****

Silver ion technology is a revolutionary antimicrobial solution from Agion Technologies, Inc., a leader in providing safe, natural antimicrobial solutions using silver to minimize the impact of destructive bacteria, mold, mildew and other microorganisms. Silver is a naturally occurring element that has been proven safe and effective in fighting a wide range of microbes. Silver is environmentally friendly with no toxic effects on people, plants or animals. Used by doctors and in hospitals, homes and offices, from catheters to cafeterias, Agion antimicrobial is effective in controlling bacteria and helps to keep surfaces clean. Now available in PVC-free, high-performance upholstery, this product is not only highly effective, but has a reduced environmental-impact benefit. No chlorine, no bromine, no plasticizers, no PVC.

Who says performance can't be **"green"**?

General Fabric Category Information

For your ergonomic chair needs... Many Collections to choose from ..ENJOY !

1. Everyday Quality

Our commitment to the environment means we select fabrics that are higher quality than the import or superstore variety. We choose these based upon longevity; as the upholstery should last as long as the other quality parts used in the manufacturing process.

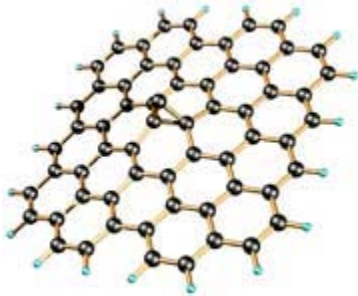

2. Eco Green – Earth Friendly

These products that have earned our Reduced Environmental Impact designation are produced of the following fibers or materials:

- 100% recycled fiber, or
- 100% bio-based fiber, or
- 100% heavy metal free fiber, or
- 100% natural, compost-able fiber

GreenShield is a patented, nano-particle based, reduced environmental impact soil and stain protective finish. GreenShield's unique chemical architecture is comprised of spherical particles that deliver water and stain repellency more efficiently than other performance finishes available in the marketplace. Simply put, GreenShield delivers soil and stain protection using less chemistry.

GreenShield is SCS Indoor Advantage Gold certified.

3. NANO

Specialty Designed Fabrics

- Fabrics that breathe
- Fabrics that spills wick away
- Fabrics that feature heavy duty wear
- Fabrics that are design sensitive...great looking!
- Fabrics that are **AFFORDABLE**

Nano Technology in the office! Liquids wick away and don't absorb. YES...you don't spill everyday, but consider a fabric that has these properties to wick away liquids, will do the same for dust, dirt and other contaminants which cause abrasion wear; not to mention the fabric will keep its' "as new" and "fresh" appearance.

A NANO-TECHNOLOGY FABRIC THAT IS WATER REPELLENT, STAIN RESISTANT, WRINKLE RESISTANT AND BREATHABLE. THIS IS NOT A "FINISH" OR TROPICAL TREATMENT. THE SOFTNESS, WATER REPELLENCE, STAIN RESISTANCE AND WRINKLE RESISTANCE OF THIS NEW NANO-TECHNOLOGY (ALSO KNOWN AS NANOTECHNOLOGY) TEXTILE FABRIC WILL NOT WASH OUT WITH REPEATED WASHINGS SINCE THE ACTUAL TEXTILE FABRIC HAS BEEN TRANSFORMED ON A MOLECULAR BASIS, NOT ON A SURFACE BASIS.

4. Nauga Leather ...Vinyl

An affordable leather-like finish; performance enhanced with the durability and clean-ability of vinyl. Numerous characteristic benefits such as:

Bacterial Resistance

Microbial Resistance

Cold Crack Resistance

Mildew Resistance

Oil Resistance

Bleach Resistance

Sulfide Stain Resistance

Abrasion Resistance

5. CRYPTON

Crypton® Super Fabrics is an engineered fabric. With its patented process, Crypton® is leading the performance textile industry, being the only textile that is *stain, water, and bacteria resistant*. Nothing gets through Crypton® to the cushion...nothing. For more information and FAQ about Crypton®.

“What is CRYPTON?”

Crypton® Green is a third party certified performance upholstery fabric which combines a reduced environmental impact benefit with the performance attributes of Crypton® Super Fabric. All Crypton® Green fabrics are produced using environmentally preferable fibers and yarns. These fabrics resist spills, stains, odor and microbial growth while protecting the furniture's under padding with an integrated moisture barrier.

Recommended for 24/7 & 911 chairs.

6. **AGION** .. The science behind clean.

Now & Zen
woven agion® collection

Traditional antimicrobial-treated performance fabrics and vinyls can lose their antimicrobial efficacy over time due to regular cleaning and abrasion. In addition, some antimicrobial treatments may use synthetic chemicals or volatile substances, which can be potentially toxic and dangerous at inappropriate levels. Conversely, surface materials with Agion active antimicrobial technology built in, safely and continuously resist microbes and bacteria on the protected surface of the upholstery for the life of your furniture.

“What is Agion®?”

Agion® patented antimicrobial is "built in" to the upholstery, becoming an integral part of the material, unlike topically applied treatments.

Safe, effective and durable, Agion® antimicrobials are based on ion-exchange technology. Upon contact with moisture, silver ions are activated and released at a steady rate. These ions provide broad-spectrum, continuous protection against microbes on the protected surface of the upholstery.

7. **PVC Free Vinyl**

Q: These products are “PVC-free.” Why is that important?

A: PVC (polyvinyl chloride) contains many additives that, when disposed of by incineration or landfill, can create toxic emissions. The chemicals in the toxic emissions are both harmful to humans and the environment. These revolutionary new upholstery fabrics are not only high in performance, but they provide a reduced environmental impact benefit by being PVC-free.

Q: These products are “plasticizer-free.” Why is that important?

A: Plasticizers are used typically in PVC (vinyl) products to soften the “hand” and increase the

“pliability” of the product. Plasticizers can leach out of the product over time. Some plasticizers are considered to be toxic and therefore potentially dangerous. These products do not contain plasticizers, yet remain soft, pliable and actually increase the comfort of your furniture.

8. Vinyl

High Performance Vinyl

The scientists who developed vinyl in the 1920s had no idea that their invention would come to play a vital role in our everyday lives -- helping make products that are safer, easier to use, clearer, cleaner, more durable, more economical and simply better. Affordable yet durable, with performance characteristics at an affordable price:

Bacterial Resistance

Microbial Resistance

Cold Crack Resistance

Mildew Resistance

Oil Resistance

Bleach Resistance

Sulfide Stain Resistance

Abrasion Resistance

sta*kleen™

9. Sta-Kleen

.... or should we say kid clean!

Sta-kleen is a long lasting "shield" that protects the surface of the upholstery from ink graffiti and other damaging stains. Stains such as ball point ink, yellow mustard and other traditionally difficult stains are easily removed and virtually "erased" by cleaning with a dry cloth or mild soap and water.

sta*kleen™

10. Collection Fabrics

The Motor City Collection

Inspired by the style and attention to detail of classic American automobiles, this collection of contract seating fabric celebrates iconic design and elegant style. From classic fins to steering wheels, these patterns include subtle textures, bold, colorful geometrics and versatile coordinates.

All patterns in the "Motor City Collection" include a soil and stain resistant finish and, like their design inspirations, are crafted with pride in North America.

Fuel your passion and take these patterns for a spin!

MICHAEL GRAVES

C O L L E C T I O N

World-renowned architect and American Master Michael Graves crafted this award-winning Woven Crypton® collection which features nine patterns available in 95 vibrant yet timeless colors. Inspired from an important time that helped shape his career, the collection celebrates the landscapes, colors and architecture of Italy.

"My studies in Rome in the early 1960's transformed how I looked at the world around me. In this collection, I recall, in a subliminal way, the magnificent and picturesque landscapes of Tuscany and Umbria through expressive pattern and color"

PATTY MADDEN

S O F T W A R E

This energetic vinyl collection features Patty Madden's signature interplay of texture, light and color. Protected by Zeron®, an advanced, proprietary top-coat system that extends performance and durability making these products perfect for your next healthcare or hospitality project.

"The colors in the Software Collection were inspired by translucent glasswork- luminous, layered hues that appear lit from within. These colors have a life in them that shifts depending on your perspective; depending on the light of a space."

11. Exotic and Unusual

When you just have to have something different. Something that says a lot about you. Something that fits your style. Something that says this chair is special, because you are special too.

From Pigskin Suede to Ostrich, Snake Skin, and more!

The best NEWS is they are affordable imitations that look and feel like the real thing.

12. Timeless Oldies

Those rugged fabrics of years ago are still available today. These fabrics have endured the test of time because of their superior wear and are ready if you just need to match the office décor.

Many of these were used on "State contracts" just because they wore like a good pair of denim jeans. They just wouldn't wear out.

If you are needing the best product available for intensive multi shift use chairs, such as 911 or 24/7, look to CRYPTONS and Agion woven or Agion vinyls.
